

Open Letter to Shareholders: Progress in Our Video and Cloud Business

SCOTTSDALE, AZ -- (Marketwired) -- 04/15/13 -- Rick Smith, Founder & CEO of TASER International, Inc. (NASDAQ: TASR), today issued the following letter to shareholders:

To All TASER Shareholders,

It's been a little over a year since we introduced the AXON Flex™ camera system with EVIDENCE.com, a new and significant growth opportunity for TASER. This new technology is enabling us to expand our presence in a \$10 to \$20 billion dollar annual market for public safety technology for which we are uniquely positioned due to our relationship with more than 16,000 U.S. law enforcement agencies. I also want to share some insights from our Analyst Day hosted at NASDAQ in New York last month as many of you could not attend in person.

This week, the New York Times reported on a groundbreaking study from the Rialto (CA) Police Department and Cambridge University (UK) examining the effects of on-officer cameras, using our AXON Flex on-officer camera system. Employing a carefully controlled study design, the investigators demonstrated dramatic reductions in both citizen complaints against police (down 87.5%), and incidents involving the use of force (which were reduced by 59%). The Rialto study utilized a rigorous, prospective and randomized study design. Its results are further supported by results reported less formally from other agencies across the U.S.

| <i>Agency</i> | <i>Citizen Complaints</i> | <i>Use-of-Force</i> |
|-------------------------------|---------------------------|---------------------|
| Rialto Police Department | Down 87.5% | Down 59% |
| Lake Havasu Police Department | Down 58% | Down 8% |
| Pittsburgh Police Department | Down 74% | Not Reported |
| Tonganoxie Police Department | Down 100% | Down 90% |
| Swinomish Police Department | Down 50% | Down 30% |
| Sikeston Police Department | Down 20% | Down 40% |
| Morrilton Police Department | Down 20% | Down 60% |
| Oviedo Police Department | Down 58% | Down 30% |

This new data provides compelling evidence that the AXON Flex on-officer video system is fast becoming a proven capability to reduce our customers' substantial legal costs. According to a study by the Associated Press, U.S. law enforcement agencies spend an average of more than \$2,500 per officer per year in payouts to settle claims against the agency -- which aggregates to well over \$2 billion annually for agencies across the U.S.

We see several similarities to our market entry with TASER® weapons over a decade ago when looking at the video market. When we launched the TASER M26™ in late 1999, there was widespread skepticism about electrical weapons. There were two factors that overcame this skepticism. The first factor was the emergence of statistics showing that the deployment of TASER M26 devices was yielding significant and measurable reductions in injuries to both officers and suspects, as well as reductions in deaths during use-of-force incidents. This data was used to show that the cost savings from deploying TASER weapons yielded a significant and positive return on investment for the agency.

The second factor that overcame early TASER weapons skepticism was the personal experience of officers in the field. One officer, from Washington State, initially expressed that he had "zero" interest in using a TASER weapon. However, after just a few weeks in the field with a TASER M26, he was able to safely end dangerous situations where he would previously have had to place his personal safety at risk and potentially cause significant harm to the subject. In a later e-mail I recall him writing, "They can pry my TASER from my cold dead fingers!"

We are now seeing these same two factors emerge in the on-officer video space. In addition to the statistics shown above, which demonstrate that our video solutions yield substantial reductions in major cost areas, we now regularly hear from officers who tell us they do not want to go on duty without their AXON Flex camera. This feeling is compounded after the officer experiences a complaint that is quickly resolved due to the video. You can hear it from the officer in their own words in the video on our AXON Flex web page at <http://www.taser.com/products/on-officer-video/axon-flex-on-officer-video>

We have invested significant resources since 2008 to build our AXON Flex and EVIDENCE.com ecosystem. Fortunately, we have built a sound company that has enabled us to make these investments, while simultaneously returning over \$52 million in cash to shareholders via share repurchases (with another \$25 million share buyback currently in-process). All of these investments and cash returns have been funded by cash flow from the business.

We have set out on a mission to build technologies that make the world safer. We knew in our hearts that enabling public safety officers to record video events of encounters would greatly reduce the controversies surrounding police work -- thereby reducing citizen complaints, litigation and the associated financial costs. However, even we were surprised to see just how significantly these new video capabilities altered the outcomes of these incidents themselves -- deterring aberrant behavior such that the frequency of incidents escalating to violence has dropped dramatically where the AXON on-officer video system is employed.

At our Analyst Day in New York last month, we laid out our Public Safety Platform Strategy and a vision for how we can grow the company over the next 3-5 years. Our most valuable asset doesn't come from any one product, or even our intellectual property portfolio of the more than 100 patents we hold for our core Conducted Electrical Weapon technology.

Our most valuable asset is the strong brand relationship that we have built with more than 16,000 law enforcement agencies around the world.

We realized our expertise is more than just making electrical weapons. Our most valuable expertise is in how to take advanced technology, make it reliable and easy to use for our core market, and deliver it with the training and support services to enable practical solutions for our public safety customers.

The last company to revolutionize law enforcement was TASER International. Through our TASER weapons, which are now deployed by more than 90% of U.S. law enforcement agencies, we have fundamentally changed policing and saved more than 100,000 lives from potential death or serious injury.

The next company to revolutionize law enforcement will be TASER International. Our new AXON Flex & EVIDENCE.com platform will change the way police agencies interact with their broader communities. These smart devices, cloud hosted software, training and support services create a Public

Safety Platform that will enable our customers to rapidly deploy new technologies, with minimal technical expertise required on their parts.

We believe that digital video and multi-media will become the centerpiece of law enforcement records in the future. We are building a platform that has the potential to dramatically improve the security, efficiency and quality of those records.

We estimate our public safety customers spend between \$10 and \$20 billion on technology each year in the U.S. alone. The global annual market is likely five to ten times larger. Our customers in the U.S. spend more than \$2 billion each year on settlements for legal complaints filed against their agencies. The data from Rialto and other agencies show our solutions can dramatically reduce those expenditures.

At our Analyst Day, we presented models showing that, with reasonable assumptions we believe we can grow TASER to between \$166 million and \$303 million in revenue over the next three to five years. None of these models assume the kind of rapid adoption we saw with TASER weapons in the early 2000's.

We believe we have positioned TASER International to deliver an end-to-end solution that brings capabilities our customers have never seen before, using a new technology delivery model that enables us to innovate faster, thereby accelerating our customers' ability to deploy the leading edge technology required to protect society in a fast changing world.

We solve big, important problems for our customers, creating significant value for all our stakeholders, including our customers, our employees, our shareholders and society at large. Solving big problems is neither easy nor quick. We've done this before, in this market, with these same customers. The reason for this letter is to share some of our insights into what we see happening, including leading indicators in both qualitative and quantitative feedback from our customers that provide evidence that change is taking hold.

I'd like to thank you, our shareholders, for your patience and support. We can all take pride in knowing we have built more than a solid and profitable company. We have changed the world for the better, and we have set the foundation to do it again.

Sincerely,

Rick Smith
Founder & CEO

About TASER International, Inc.

TASER International, Inc. (NASDAQ: TASR) is a global provider of safety technologies that protect life and prevent conflict. More than 16,000 public safety agencies in 100 countries rely on TASER® conducted electrical weapons and AXON on-officer camera systems to help protect and serve. Today, the use of TASER CEWs has saved more than 100,000 lives from potential death or serious injury while TASER innovations benefit individuals and families too, providing personal protection and accountability while maintaining regard for life. Since 1994, more than 260,000 individuals have relied on TASER technology as a means for effective personal safety. Learn more about TASER International and its solutions at www.TASER.com and www.EVIDENCE.com or by calling (800) 978-2737. Be a part of the TASER community by joining us on Facebook, LinkedIn, Twitter, and YouTube.
