

EVIDENCE.com Announces Webinar Showcasing Leadership In Cloud Security For Evidence Management In Law Enforcement Security Team To Highlight CJIS Compliance

SEATTLE, Jan. 15, 2015 /PRNewswire/ -- TASER International (NASDAQ: TASR), a global leader in body-worn cameras and evidence management for law enforcement, today announced that the EVIDENCE.com security team will host a webinar on tips for choosing a cloud service provider you can trust.

One topic that is important to our customers, and will be covered in the webinar, is the Criminal Justice Information Services (CJIS) requirements. EVIDENCE.com runs on Amazon Web Services (AWS) and they have provided customers with an approach to run CJIS-compliant applications on the AWS Cloud since 2013. The AWS CJIS Workbook provides partners and customer agencies a systematic approach to documenting their implementation of CJIS security requirements for review and authorization.

There are currently more than 3,700 police agencies in the U.S. who trust TASER's cloud-based digital evidence management platform, EVIDENCE.com to securely store and manage the digital evidence from their body cameras, dash cameras, phones and other digital devices.

"All of our digital evidence requires secure and efficient download, storage, and retrieval that meet rigorous evidence standards for our industry," said Salt Lake City Police Chief Chris Burbank. "To ensure the integrity of the chain of custody, we needed a technology partner that was committed to providing the most secure, scalable, and cost-effective solution for managing all types of digital evidence, while adhering to strict regulatory obligations. That is why we choose EVIDENCE.com's digital evidence management system to implement a secure end-to-end solution for our department," concluded Chief Burbank.

"We understand the importance of meeting the unique security requirements of our law enforcement customers, which is why EVIDENCE.com has always complied with the FBI's CJIS Security Policy," says Marcus Womack, General Manager of EVIDENCE.com. "Our work with AWS includes a shared commitment to ensuring a secure, CJIS-capable infrastructure for supporting law enforcement's regulatory obligations."

TASER protects EVIDENCE.com with a robust and comprehensive security program far beyond the capabilities of competing solutions or on-premise solutions. This includes a dedicated security team, advanced attack detection and response, regular vulnerability testing, detailed audit logs, robust encryption, and much more. You can find an overview of the entire EVIDENCE.com security program here: www.evidence.com/security/

If your agency is considering a move to the cloud, learn what questions to ask potential partners by joining our webinar titled, **How to Choose a Cloud Service Provider You Can Trust**. The webinar will take place on Wednesday, January 28, 2015, at 10:00am PST. For more information or to sign-up, visit the registration page.

About EVIDENCE.com

EVIDENCE.com helps police capture, manage, and share their digital evidence without the complexity or cost of installing in-house servers. It enables greater transparency through seamless integration with the industry-leading AXON body-worn video cameras. EVIDENCE.com is the most secure, scalable, and cost-effective solution for managing all types of digital evidence. EVIDENCE.com automates the upload process to ensure security and integrity while keeping officers in the field rather than sitting at computers.

About TASER International, Inc.

TASER International makes communities safer with innovative public safety technologies. Founded in 1993, TASER first transformed law enforcement with its electrical weapons. TASER continues to define smarter policing with its growing suite of technology solutions, including AXON body-worn video cameras and EVIDENCE.com, a secure digital evidence management platform. More than 138,000 lives and countless dollars have been saved with TASER's products and services.
