

Wichita Police Department Deploys 429 Axon Flex Cameras with Evidence.com from TASER

SEATTLE, Aug. 24, 2015 /PRNewswire/ -- TASER International (NASDAQ: TASR) today announced large orders of its Axon body-worn video cameras and Evidence.com solution, a back-end digital evidence management system. These orders were received in the third quarter and will be shipped in the third and fourth quarter of 2015.

Large orders were received from the following domestic agencies:

- Wichita Police Department (KS): 429 Axon Flex cameras with five years of Evidence.com and TASER Assurance Plan (TAP)
- Brownsville Police Department (TX): 140 Axon Body cameras with five years of Evidence.com and TAP
- Parker Police Department (CO): 59 Axon Body cameras with five years of Evidence.com and TAP
- White Plains Police Department (NY): 50 Axon Body cameras with five years of Evidence.com and TAP, add-on order
- Elkton Police Department (MD): 38 Axon Flex cameras with five years of Evidence.com and TAP
- Lincolnton Police Department (NC): 32 Axon Flex cameras with five years of Evidence.com and TAP
- Barberton Police Department (OH): 32 Axon Body cameras with five years of Evidence.com and TAP
- Takoma Park Police Department (ND): 30 Axon Body cameras with five years of Evidence.com on the Officer Safety Plan

TASER's Axon body-worn cameras are small, yet highly visible, and can be attached securely to sunglasses, a cap, a shirt collar, or a head mount. They are powered by a pocket-sized battery pack, which ensures recording capability during an entire shift. When recording, the cameras capture a wide-angle, full-color view of what an officer is facing. The video automatically uploads via a docking station to Evidence.com, a cloud-based storage and management system, where it can be easily accessed for review. The video files stored online or on the Axon video camera are secure and cannot be tampered with.

Evidence.com helps law enforcement capture, manage, and share their digital evidence without the complexity or cost of installing in-house servers. It enables greater transparency through seamless integration with the industry-leading Axon body-worn video cameras. Evidence.com is the most secure, scalable, and cost-effective solution for managing all types of digital evidence. Evidence.com automates the upload process to ensure security and integrity while keeping officers in the field rather than sitting at computers.

There have been several studies conducted recently on the positive effects body-worn cameras can have on a police force and community. These studies include a year-long Cambridge University study conducted at the Rialto, CA Police Department that showed an 88% reduction in citizen complaints and a 60% reduction in uses of force after implementation of TASER's Axon flex cameras. The San Diego Police Department also released a report showing the use of Axon body-worn cameras resulted in a 41% drop in complaints, 60% drop in total allegations and a 47% decline in "personal body" force by officers. The use of pepper spray was also reduced by 31%. In a study by Arizona State University, the Mesa Police Department's use of Axon cameras revealed a 48% reduction in citizen complaints against camera officers for misconduct during the study period, and a 75% decline in use of force complaints.
