

After Extensive Testing, Seattle Police Department Selects TASER's Axon Platform for Cameras and Software

Washington's Largest Agency is 35th Major City to Adopt TASER's Axon Platform

SEATTLE, Nov. 7, 2016 /PRNewswire/ -- Axon, a business unit of TASER International (NASDAQ: TASR) and the global leader in digital evidence management solutions with the leading body-worn camera, today announced the selection of the Axon body-worn video platform by the Seattle Police Department. In addition to the cameras, Seattle PD will secure a subscription to Evidence.com, Axon's cloud-based digital evidence management platform. The initial deployment of cameras is estimated to start in December 2016. Final contract details are still being negotiated at this time.

Seattle PD's decision follows an extensive body camera pilot program that tested Axon's body-worn camera and digital evidence management solution against five competitors, which can be viewed at: <http://costthebuyline.wpengine.netdna-cdn.com/wp-content/uploads/2016/10/RFPSPD3640Round3scoring.pdf>. In the final round of scoring TASER's Axon platform received the highest marks, scoring nearly double the points against two competing body camera vendors. These scores can be viewed at: <http://costthebuyline.wpengine.netdna-cdn.com/wp-content/uploads/2016/10/RFPSPD3640Round4scoring.pdf>

"We are honored to have been selected by Seattle PD after an extensive review and field trial program," said TASER CEO and co-founder Rick Smith. "We believe wearable cameras coupled with the power of Evidence.com will help accelerate the city's bold move toward smarter, more transparent policing. We're thrilled to be working with Seattle PD as it adopts our new technology."

Through the use of Axon's body cameras and the Evidence.com platform, both officers and the community will benefit from the ability to capture, document and preserve crucial evidence from the field. Additionally, Evidence.com provides officers a more efficient, straightforward and secure process for storing, managing, and sharing digital evidence.

To date, more than 100,000 licenses have been booked on the Axon network worldwide. The Axon network seamlessly integrates devices and apps to enable powerful capabilities for building safer communities. The Axon network includes:

- **Smart Devices** – Body cameras and in-car video that leverage technology such as Bluetooth® wireless technology and Wi-Fi® to better track and manage data
- **Mobile Apps** – Evidence management for iOS and Android devices with Axon View and Axon Capture
- **Unified and Integrated Digital Evidence Management System (DEMS)**– One platform that removes siloed DEMS through cloud computing, integrations across media points, and open file standards that do not require proprietary file formats or media players
- **Forensic Suite Tools** - Forensic analysis via Axon Five and Axon Detect and proprietary video format conversion via Axon Convert
- **Connected Ecosystem** – From capture to courtroom, securely share and track digital evidence across public safety stakeholders
- **Digital Verification and Audit Logs**– Record every interaction with any piece of digital evidence including capture, ingest, retrieve, manage, and share
- **Advanced Security** – Industry-leading people, practices, and products that comply with CJIS at both the infrastructure and application layers and ISO/IEC 27001
