

Axon Reports Record Revenue of \$95 Million for Q4 2017 and \$344 Million for Full Year 2017; Introduces 2018 Financial Guidance

SCOTTSDALE, Ariz., Feb. 27, 2018 /PRNewswire/ -- Axon (Nasdaq: AAXN), the global leader in public safety technology, today released the following quarterly update letter to shareholders.

- Record annual revenue of \$344 million, up 28% from 2016
- Q4 revenue of \$94.7 million, up 15% year-over-year
- Q4 GAAP EPS of (\$0.04) includes \$8 million tax reform-related charge; Non-GAAP EPS of \$0.13
- \$82 million of cash and short-term investments and zero debt at December 31, 2017
- Completed the largest ever cloud data migration, moving 20 PB of data onto Microsoft's Azure cloud
- Introduces 2018 financial guidance, including 16%-18% revenue growth and 300-400 basis points of operating margin expansion

Dear shareholders,

Today we are reporting our financial results for the fourth quarter ended December 31, 2017 and we are providing our 2018 outlook.

We've just completed a pivotal year where we changed our company name from TASER International to Axon Enterprise (Axon) to better reflect our go-forward mission and made significant investments to drive progress within our four strategic growth areas: 1) TASER conducted electric weapons (CEWs), 2) body-worn cameras and evidence management, 3) Axon Fleet in-car video systems, and 4) Axon Records. We also made investments in our international direct sales strategy and artificial intelligence and machine learning capabilities.

We don't intend to slow down in 2018. At our Investor & Analyst day in November 2017, we laid out a financial strategy to shift to recurring cash flows, to invest in products and features that expand our total addressable market and to drive profitability through disciplined execution.

This year, we plan to introduce several new products and services and improve upon our existing suite of offerings - which we believe will grow recurring cash flows and increase average revenue per user. We're also scaling up our offices across the world and cross-pollinating our internal groups to ensure we execute against one vision for Axon. In short, we are focused on disciplined execution and preparing for significant growth across the globe.

Finally, we are driving toward profitability in the Software & Sensors segment and remain committed to expanding total company operating margins, which we address in more detail below.

Summary of Q4 2017 Results:

- Net sales increased 15% to \$94.7 million in Q4 2017 compared to \$82.1 million in Q4 2016.
- Consolidated gross margin was 66.6% in Q4 2017 compared to 55.1% in Q3 2017 and 60.6% in Q4 2016.
 - Sequential gross margin improvement was tied to a favorable mix of product shipments, lower data storage costs, lower costs associated with Axon Fleet shipments, more favorable pricing, and fewer shipments into new international markets at beachhead pricing. We expect 300 to 400 basis points of the gross margin strength to be non-recurring.
- Total operating expenses in Q4 2017 were \$55.4 million, compared to \$40.4 million in Q4 2016.
 - Q4 2017 operating expenses include \$0.9 million in costs associated with our Q4 reduction in force and a non-cash intangible asset abandonment charge of \$1.1 million. Excluding these items, operating expenses would have been \$53.3 million, up 5.5% sequentially from Q3 2017, which is in line with our guidance of 5% to 8% sequential operating expense growth.
 - We estimate that the Q4 restructuring will result in approximately \$4.5 million in annual operating expense savings beginning in 2018. We are also pleased to note that we're starting to see a positive impact from the expense control initiatives put into place in early November. In fact, we have started to bend the cost-growth curve compared to prior trend. Travel expenses in November and December, for example, declined 9% year-over-year.
- Income from operations was \$7.6 million in Q4 2017 compared to \$9.4 million in Q4 2016. Operating margin in Q4 2017 was 8.1%.
- Our GAAP net loss for Q4 2017 was (\$2.1 million), or (\$0.04) per diluted share, compared to net income of \$6.3 million, or \$0.12 per diluted share, in Q4 2016.
- Non-GAAP net income for Q4 2017 was \$7.1 million, or \$0.13 per share, and excludes the following:
 - An \$8.0 million non-cash write down of our net deferred tax asset due primarily to a decrease in the US tax rate under the Tax Cuts and Jobs Act that was signed into law on December 22, 2017. Our net deferred tax asset was valued at a 35% federal tax rate and thus, is worth less under the new lowered corporate tax rate of 21%, and requires a one-time tax adjustment. (The net result of the Act is positive for us in the long term, however.)
 - A \$1.1 million non-cash intangible asset abandonment charge.
- For the first time this quarter, we are introducing a new non-GAAP net income that excludes stock-based compensation expenses, and we will provide that going forward. With this added adjustment, our non-GAAP net income was \$9.7 million, or \$0.18 per share, which compares to \$8.0 million, or \$0.15 per share, in Q4 2016.
- Adjusted EBITDA for Q4 2017 was \$14.8 million compared to \$13.1 million in Q4 2016. This represents 13% growth year-over-year. We calculate adjusted EBITDA by adding back or subtracting to EBITDA the following:
 - adding \$4.2 million in stock-based compensation expense;
 - adding \$1.1 million in one-time losses on the disposal and abandonment of intangible assets.
- In Q4 2017, cash provided by operating activities was \$24.3 million. Cash, cash equivalents and short-term investments were \$82.0 million at December 31, 2017, compared with \$61.8 million at the end of Q3 2017.
- We executed on our stated objective of managing inventory down to below \$50 million by year end. Total inventory for Q4 2017 decreased to \$45.5 million from \$52.7 million at the end of Q3 2017 and \$60.7 million at the end of Q2 2017.

TASER Weapons:

- TASER Weapons segment revenue increased 10% to \$64.4 million in Q4 2017 compared to \$58.3 million in Q4 2016 as we executed against our mission to make a TASER conducted electric weapon available to every officer.
- TASER Weapons segment gross margin was 70.9% in Q4 2017 compared to 69.3% in Q4 2016. The margin strength is due to favorable mix and leverage on higher revenue.

In Q4 2017, approximately 38% of units ordered, including from international customers, were on the TASER 60, Officer Safety Plan, or TASER Assurance Plan payment options. This compares to the 43% of weapons sold on a payment plan in Q3 2017, which indicates our customers continued willingness to pay for weapons hardware via payment plan and supports our stated financial goal of increasing recurring cash flows.

Two of our top three TASER contracts signed in Q4 2017 were procured via the TASER 60 payment plan. We're also seeing increased adoption of our TASER X2 two-shot CEW, proving that customers see value in having an immediate backup shot.

Looking forward, our TASER weapons sales pipeline remains solid, reflecting continued strong demand domestically and increasing interest across international markets. We believe that continued investments in smart weapons technology and incident reporting will further enhance our value proposition over the long term.

Software & Sensors:

In early December 2017 we completed the migration of the U.S. instance of Evidence.com to Microsoft Azure. We announced the strategic decision to switch to Microsoft Azure in Q4 2015, with the goal of better aligning our cloud-hosted services with our customer preferences. We believe that ours was the largest application ever to migrate between two public cloud providers. Throughout the migration, we focused on the three priorities of correctness, minimal impact to customers and security. Preserving the integrity and privacy of our customers' evidence data continues to be our highest priority.

Although the initiative spanned two years and thousands of hours of work, the switch on a Sunday morning in early December required only one hour of downtime and resulted in no reported application bugs, nor security or compliance issues for our customers. This smooth transition highlights our team's competence and subject matter expertise in site reliability engineering, software engineering, product management, information security, and customer support engineering.

Importantly, our partnership with Microsoft is already generating positive results, helping us win several major city police agencies in the U.S. and one large international customer. The partnership will also allow us to reduce our storage and server costs going forward.

We incurred a total of \$0.7 million of migration and duplicate storage cost in Q4 2017 compared with our projection of \$1.0 million for the quarter and our Q3 2017 incurred costs of \$1.4 million.

- Software & Sensors segment revenue grew 27% year-over-year to \$30.2 million in Q4 2017 compared to \$23.7 million in Q4 2016.
 - Software & Sensors product revenue was \$13.1 million in Q4 2017 compared to \$12.5 million in Q4 2016.
 - Software & Sensors service revenue was \$17.1 million in Q4 2017 compared to \$11.2 million in Q4 2016.
- Software & Sensors segment gross margin was 57.3% in Q4 2017 compared to 39.4% in Q4 2016.
 - Service gross margin was 68.2% in Q4 2017, compared to 82.7% in Q4 2016.
 - Hardware product gross margin (excluding services) was 43.0% in Q4 2017 compared to 0.5% in Q4 2016. Hardware product gross margins also benefited from a favorable mix and we believe that 1,100 to 1,300 basis points of the margin strength is non-recurring.
- Annual recurring service revenue grew 74% year-over-year to \$70.0 million in Q4 2017 compared to \$40.2 million in Q4 2016.
- Q4 2017 bookings were strong, coming in at \$71.2 million, while Q4 2017 future contracted revenue rose to \$536 million from \$494 million in Q3 2017. Annual bookings grew 15% year-over-year from \$254 million in 2016 to \$291 million in 2017. Unit shipments in Q4 2017 reflected the Q3 2017 or early Q4 completions of several large customer deployments.

Unit shipments also reflect some large deployments that pushed into Q1 2018. Q1 2018 is already off to a strong start for new orders. Australia's Victoria Police will deploy 11,000 body cameras backed by Evidence.com, which will represent our second largest body camera deployment.

We recorded 13 competitor conversion wins in Q4 2017 where our body-worn camera or Axon Fleet offering displaced a competitor, bringing our 2017 total to 46 customer conversions. In Q4 2017, we recorded 11 expansions where a state or major city police agency chose to upsize their contracts and expand their reliance upon the Axon network.

Independent research reports continue to validate the benefits of body camera technology. In Q4 2017, an independent study was published showing that use-of-force complaints fell 37% at the Las Vegas Metropolitan Police Department (LVMPD) after the agency deployed Axon body-worn cameras. Researchers also performed a cost-benefit analysis and found that body-worn cameras could ultimately save LVMPD up to \$4 million per year in legal fees. The study was conducted by the University of Nevada, Las Vegas, and CNA, a non-profit research and analysis organization, and was funded by the U.S. Department of Justice.

As of December 31, 2017, 37 of the 69 U.S. major city law enforcement agencies had purchased Axon body-worn cameras or our digital evidence management solution: Albuquerque, Atlanta, Austin, Baltimore, Baltimore County, Charlotte-Mecklenburg, Chicago, Cincinnati, Cleveland, Dallas, Denver, Fort Worth, Fresno, Las Vegas, Los Angeles, Louisville, Memphis, Mesa, Miami, Milwaukee, Minneapolis, Montgomery County, New Orleans, Omaha, Philadelphia, Pittsburgh, Sacramento, Salt Lake City, San Antonio, San Diego, San Francisco, San Jose, Seattle, Tampa, Tucson, Washington DC, and Wichita.

Axon's Evidence.com platform user count continued to grow, extending our market leadership. During the three months ended December 31, 2017, we booked approximately 14,100 seats on our digital evidence management platform, Evidence.com, net of renewals. Since inception, we have booked cumulative Evidence.com licenses of approximately 201,500.

Product Pipeline:

Evidence.com - Evidence.com is a revolutionary way to manage digital evidence and the platform continues to expand its use cases. In fact, among agencies that are not yet ready to deploy body cameras, we are starting to see interest in Evidence.com products, including Axon Capture, which enables officers to capture evidence using their mobile phone cameras. Looking ahead, we see a significant

opportunity to sell our software to agencies who are not using Axon hardware.

We are pleased to note that the new redaction studio capabilities we rolled out in Q4 2017 are being met with positive reception from our early access program customers. One police agency redaction specialist told us, "The Studio is a vast improvement on redaction! The object tracker works great, and when it misses, it's easy to realign. Spray Paint is super as well! I am so glad we have this new tool, once we get the hang of it well, it's going to be awesome, it already is! Thank you again."

Also, we are enhancing Evidence.com to make it easier for departments to ingest CCTV footage, which is currently a large pain point for our customers. Agencies want to put all forms of video into Evidence.com to take advantage of its advanced capabilities, such as sharing with detectives and prosecutors, as well as allowing videos to be redacted.

Axon Citizen - Axon Citizen, the public evidence submission tool that we announced in Q4 2017, is also receiving positive feedback from early access agencies. Axon Citizen allows members of the community to use their mobile phones to send evidence directly to departments. It's exciting for us to watch agency customers take ownership of the tool and inform their own constituencies about their efforts to make communities safer <https://www.youtube.com/watch?v=iYZQYZTKli4>. In Q4, Axon Citizen helped with its first arrest after officers in an East Coast agency used the tool to allow a burglary victim to send videos of the suspect.

Without Axon Citizen, if a member of the community has evidence on a mobile phone, the officer has to confiscate the phone for a week or longer to obtain the data. Officers also receive photos from the public via e-mail, which means the photo evidence lacks the audit trails required by law to be admissible in court and lacks meta-data to tie it to a specific case. Axon Citizen solves these problems by allowing an officer to text a secure link to victims and eye-witnesses, who can upload evidence to the department via Axon's secure cloud-based system.

We're planning to launch a community-wide public evidence submission tool in mid-2018 that will allow departments to more easily manage evidence related to larger scale crimes, such as missing persons, shootings, bombings, or natural disasters.

Camera Hardware - We also continue to invest in and improve our camera hardware. In February, we opened a small R&D office in Tampere, Finland, the country's second largest metropolitan area. A new team of world-renowned imaging experts (formerly the Nokia camera imaging team) have begun working on our next-generation body camera and Axon Fleet hardware. This added team is budget-neutral relative to the three-year plan we laid out at our November 2017 Investor & Analyst Day.

Signal Sidearm - We have been improving and fine tuning our Signal Sidearm offering, which signals Axon cameras to begin recording after an officer removes a firearm from its holster. We're presently rolling out new functionality, which includes eliminating the production of nuisance videos generated when firearms are pulled in training or for reasons that don't include an intention to shoot.

Artificial Intelligence & Machine Learning - We are applying AI, machine learning and data science to common policing problems and eliminating pain points for agencies. Our AI investments in 2018 will span our product sets, including AI services at the edge (within devices) and in the cloud.

Axon Records - Axon Records remains an important area of focus and investment. We are continuing to hire new software engineering talent to help us build the next generation of policing software. Our 2018 product milestone targets include launching our records management system (RMS) with select agencies. We are also actively collecting feedback from our development partners, who are running early iterations of Axon Records. We plan to deploy video-based incident report writing capability in the second half of 2018 to our early access partners.

Our customer facing team is already engaged in pre-sales activities to support the launch of Axon Records later this year.

Full Year 2018 Outlook:

For the full year ending December 31, 2018, we expect to achieve the following:

- Revenue growth of 16% to 18%;
- We will disclose 2018 revenue amounts under accounting standards 605 and 606 beginning with our first quarter 10-Q;
- Operating margin expansion of 300 basis points to 400 basis points;
- A normalized tax rate of 20% to 25%, which can fluctuate depending on geography of income, change in stock price and the effect of discrete items; and
- Capital expenditures in the range of \$12 million to \$16 million.

We remain confident in our goal of providing the premier end-to-end technology solution for law enforcement. We believe we are demonstrating the ability to morph from a hardware-only business into a subscription-hardware-plus-SaaS-solutions-and-enterprise-software company, and we look forward to updating you on our progress throughout 2018.

Signed,
Rick Smith, CEO
Luke Larson, President
Jawad Ahsan, CFO

QUARTERLY CONFERENCE CALL & WEBCAST:

The Company will host its Q4 2017 earnings conference call on Tuesday, February 27, 2018 at 2 p.m. PT / 5 p.m. ET. To join the live audio presentation, please dial toll free 877-303-9126, or for international callers, please dial+1-253-237-1156.

The call will be available via live audio webcast and archived replay on Axon's investor relations website at <http://investor.axon.com/>.

The Company has posted supplemental materials including its key operating metrics on its website to provide additional information about our fourth quarter financial results.

Statistical Definitions:

Bookings are an indication of the activity the Company is seeing relative to Software & Sensors hardware, software and Evidence.com. We consider bookings to be a statistical measure defined as the sales price of orders (not invoiced sales), including contractual optional

periods we expect to be exercised, net of cancellations, placed in the relevant fiscal period, regardless of when the products or services ultimately will be provided. Most bookings will be invoiced in subsequent periods.

Due to municipal government funding rules, in some cases certain of the future period amounts included in bookings are subject to budget appropriation or other contract cancellation clauses. Although Axon has entered into contracts for the delivery of products and services in the future and anticipates the contracts will be fulfilled, if agencies do not exercise contractual options, do not appropriate money in future year budgets or do enact a cancellation clause, revenue associated with these bookings may not ultimately be recognized, resulting in a future reduction to bookings.

For more information relative to our revenue recognition policies, please reference our SEC filings.

Non-GAAP Measures:

To supplement the Company's financial results presented in accordance with GAAP, we present the non-GAAP financial measures of EBITDA, Adjusted EBITDA and Free Cash Flow. Our management uses these non-GAAP financial measures in evaluating the Company's performance in comparison to prior periods. We believe that both management and investors benefit from referring to these non-GAAP financial measures in assessing our performance, and when planning and forecasting our future periods. A reconciliation of GAAP to the non-GAAP financial measures is presented at the end of the release.

EBITDA is defined as consolidated net income before interest expense, income taxes and depreciation and amortization. Adjusted EBITDA, as presented herein, is defined as EBITDA before certain other items, including: stock-based compensation; net gain/loss on write-down/disposal/abandonment of property, equipment and intangible assets; and loss on impairment.

Free Cash Flow is defined as cash flows provided by operating activities minus purchases of property, plant and equipment, and intangible assets.

Caution on Use of Non-GAAP Measures

Although these non-GAAP financial measures are not consistent with GAAP, management believes investors will benefit by referring to these non-GAAP financial measures when assessing the Company's operating results, as well as when forecasting and analyzing future periods. However, management recognizes that:

- these non-GAAP financial measures are limited in their usefulness and should be considered only as a supplement to the Company's GAAP financial measures;
- these non-GAAP financial measures should not be considered in isolation from, or as a substitute for, the Company's GAAP financial measures;
- these non-GAAP financial measures should not be considered to be superior to the Company's GAAP financial measures; and
- these non-GAAP financial measures were not prepared in accordance with GAAP and investors should not assume that the non-GAAP financial measures presented in this earnings release were prepared under a comprehensive set of rules or principles.

Further, these non-GAAP financial measures may be unique to the Company, as they may be different from similarly titled non-GAAP financial measures used by other companies. As such, this presentation of non-GAAP financial measures may not enhance the comparability of the Company's results to the results of other companies.

About Axon

The Axon network is a network of devices, apps and people that helps law enforcement become smarter and safer. Our mission is to protect life. Our technologies give law enforcement the confidence, focus and time they need to keep their communities safe. Our products impact every aspect of an officer's day-to-day experience:

- **In the field**- Our Smart Weapons offer a less-lethal intermediate use of force response and our body-worn and in-car cameras collect video evidence to capture the truth of an incident; and our mobile applications enable simple evidence collection.
- **At the station**- Our secure, cloud-based digital evidence management solution allows officers and command staff to manage, review, share and process digital evidence using forensic, redaction, transcription, and other tools.
- **In the courtroom**- Our solutions for prosecutors make collaborating across jurisdictions and agencies easy so that cases can be resolved quickly.

We work hard for those who put themselves in harm's way for all of us. To date, there are more than 187,400 licensed users from around the world and more than 196,000 lives and countless dollars have been saved with the Axon network of devices, apps and people. Learn more at www.axon.com or by calling (800) 978-2737.

AXON ENTERPRISE, INC.
Software and Sensors Bookings by Quarter

(Unaudited)
(in thousands)

	December 31, 2017	September 30, 2017	June 30, 2017	March 31, 2017	December 31, 2016
Bookings	\$ 71,154	\$ 77,976	\$ 81,942	\$ 60,080	\$ 72,509

Software and Sensors Future Contracted Revenue

(Unaudited)
(in thousands)

	December 31, 2017	September 30, 2017
Cumulative bookings, net of cancellations	\$ 755,731	\$ 684,577
Cumulative recognized revenue	(219,715)	(190,424)
Future contracted revenue	\$ 536,016	\$ 494,153

Future contracted revenue for the Software and Sensors segment represents a statistical measure defined as cumulative bookings minus cumulative recognized revenue related solely to that segment. Future contracted revenues are an indication of momentum of longer-term

Stock-based compensation expense, net of income tax effects	<u>\$ 0.08</u>	<u>\$ 0.05</u>	<u>\$ 0.48</u>	<u>\$ 0.43</u>
Weighted average number of diluted common and common equivalent shares outstanding	54,069	53,173	53,898	53,536

(a) Reported GAAP net loss per share for the quarter ended December 31, 2017 was calculated using the basic share count. Non-GAAP diluted earnings per share was calculated using the diluted share count.
