

Axon Announces New Fixed ALPR Camera Solutions and Next-Gen AI Advancements to Expand Real-Time Public Safety Ecosystem

Axon and Ring Partner to Transform Community Collaboration in Public Safety

SCOTTSDALE, Ariz., April 22, 2025 /PRNewswire/ -- Axon (Nasdaq: AXON), the global public safety technology leader, today announced a wave of new products and partnerships, expanding its real-time network and public safety ecosystem:

- **Axon Outpost and Axon Lightpost—two new fixed, intelligent ALPR cameras**—join Axon Fleet 3 to form a complete suite of fixed and mobile vehicle recognition solutions. Together, they go beyond traditional plate reads by capturing detailed vehicle attributes and extending real-time intelligence.
- **Axon's partner ecosystem expands**, connecting third-party cameras through a new Works With Axon certified partner program and creating the most interoperable, intelligent public safety network integrated through Axon Fusus.
- **Axon Assistant, an AI voice companion, launches via Axon Body 4** giving officers hands-free access to real-time translation, policy guidance, and general information, useful facts, and answers from the internet.
- **Axon announces plans to integrate with Ring** a leading smart security company; empowering Ring customers to share—on their terms—relevant video with law enforcement to help solve crimes faster and safeguard neighborhoods.

"Technology alone doesn't build safer communities—people do," said Rick Smith, Founder & CEO of Axon. "Our job is to innovate in ways that protect more lives in more places. That means building tools and forging partnerships that help public safety agencies connect with residents and businesses in their community so they can act faster when every second counts. We're expanding our ecosystem into one of the most collaborative and comprehensive public safety networks—alongside leaders like Ring—to deliver more intelligence and capture more truth. Paired with advances in AI, drones and robotics, less-lethal solutions, and immersive training, this is the blueprint for a safer, smarter future—and one where technology plays a critical role in achieving our mission and our Moonshot goal."

A full breakdown of the announcements, partnerships, and AI features is available in the extended release here:
